UI DETAIL

FOCUS AREAS

Replacing spreadsheets, manual processes, and outdated tools.

Designing internal CRMs, client portals, and data systems.

Building fast presentation websites and company websites.

Creating B2B/B2C commerce flows and custom configurators.

Automating orders, complaints, reporting, and system communication.

BUSINESS DETAILS

CRN: 55585027

TIN: 1079683484

Registered in the Trade Register of District Office Čadca, no. 520-35229

WORK APPROACH

Analysis, product design, development, deployment

I start by understanding business goals, processes, and the problem the system needs to solve. I define the user flow, technical approach, and realistic delivery estimate, then build in functional increments with a focus on performance, usability, and maintainability.

WORK EXPERIENCE

Web Developer

MAY 2023 - PRESENT

FREELANCE · FREELANCE · REMOTE

Freelance web development focused on front-end design, JavaScript libraries, custom web applications, e-commerce systems, internal tools, and maintainable user interfaces.

Frontend Web Developer

MAY 2023 - APR 2026

MADELO · CONTRACT · REMOTE

Architected front-end solutions, optimized performance, ensured code quality, and mentored junior developers to foster innovation and technical excellence. Collaborated with designers and back-end developers to translate complex requirements into engaging digital experiences.

Web Developer

JAN 2019 - JUN 2019

LIONBRIDGE · FULL-TIME · ŽILINA, SLOVAKIA

Worked on web development tasks involving HTML email code, CSS, and related front-end implementation work.

EDUCATION

Secondary Industrial School of Information Technology

2012 - 2016

INFORMATION TECHNOLOGY · KYSUCKÉ NOVÉ MESTO

SELECTED PROJECT WORK

Comprehensive complaints management system

2025

COMPLAINTS SYSTEM

Modern web application for digitizing and streamlining the full complaints process, from intake to final resolution. Included advanced filtering, administrator/manager/customer access levels, localization, optimized UI, and support for large attachment uploads.

Modern e-commerce platform with configurator and B2B portal

2024

E-COMMERCE

Web application for selling and presenting premium interior elements. Combined a full e-shop with sales support tools, acoustic property visualization, dynamic product comparison, and an advanced visual custom configurator.

Advanced product configurator and e-commerce platform

2025

B2B/B2C E-COMMERCE

Configurable product platform with a step-by-step smart configurator, real-time component compatibility checks, dynamic price calculation, product catalog, refined checkout, client zone, order overview, and saved configurations.

Interactive networking and event management platform

2024

SOCIAL / EVENTS

Event platform for visitors and exhibitors with profile management, CV and link uploads, interactive schedules, exhibitor catalog, QR code reader/generator for digital contact exchange, feedback, and access management.

SERVICES

Custom application development

Internal CRMs, client portals, order systems, complaint systems, data management tools, and other process-specific software.

Websites and modern web systems

Presentation websites, company websites, e-commerce platforms, B2B portals, and product configurators with attention to communication, performance, and user experience.

Business process automation

Automations and integrations that reduce manual work in orders, complaints, reporting, and communication between systems.
